

DOG•EARED has tails wagging all across America

Introducing an innovative new treatment that effectively cleans dogs' ears.

Dog•Eared's specifically designed solution of hypertonic sea water and Aloe Vera is proven safe and effective in washing away annoying and harmful ear wax from dogs' ears. The patented reverse spray nozzle was created to fit the unique L-shape structure of dogs' ears. Dog•Eared's applicator is designed to ensure proper insertion and reverses the solution out of the ear canal safely removing excess fluid, debris, and wax. Dogs' ears are left healthy, clean and less susceptible to ear infections.

Cleaner ears means happier dogs and owners:

- Dog-friendly applicator with a soft, rounded tip for comfort.
- Hypoallergenic, all-natural solution without chemicals or preservatives.
- Available in two sizes: One for puppies/small breeds; and one for large breeds.

Causes of ear infections:

- **Allergy:** 86% of dogs with allergies also have inflammation of the external ear.
- **Breed:** Specific breeds are more susceptible to ear infections.
- **Anatomy:** Deep ear canals and floppy ears are contributing factors to chronic ear infections.
- **Health:** Low thyroid, diabetes, parasites, and Cushing's disease can also trigger ear infections.

Preventative care that's easy to maintain:

Keeping dogs' ears clean is essential to their health. Regular usage of Dog•Eared will help prevent the occurrence of ear infections. Dog•Eared is so safe and easy to use, pet owners may incorporate it into their regular grooming regimen, comfortably using Dog•Eared as many as three times a week. For dogs with heavier wax build-ups, daily use is recommended.
