

What's brewing in the PetPoint lab?

Since its inception in 2004, PetPoint has been designed and driven by input from animal welfare professionals. As our family of clients has grown, great ideas continue to be suggested and make their way into PetPoint, with over 3000 requests completed to-date. Below are highlights of what the design & development teams in the PetPoint labs are working on based on user feedback, and will be coming to PetPoint in the near future:

- Animal Redesign:** the Animal screens are being redesigned into the new tabbed-style layout, to provide quicker access to all related screens for an Animal:
 - Full point-in-time tracking of specific animal details such as Altered Status, Weight, Asilomar Status, Medical Condition, Temperament Condition.
 - Express & Advanced Animal screens to speed data entry.
 - Advanced Descriptors: species specific colors & patterns and a third color drop-down.
 - Redesigned Pet ID's fully integrated with Licenses, and tracking of multiple microchips.
 - Updated picture/video controls for quicker viewing/editing.
- Animal Group:** this new module allows organizations to "link" multiple animals together for tracking purposes. This combines the Add Another Animal feature on Intakes & Outcomes with expanded animal "Buddy" functionality. Organizations can track unlimited size groups for animals, such as litters, play-mates, or adoption pals.
- Medical Redesign:** the Care - Exam & Spay/Neuter screens are being redesigned to provide greater flexibility for organizations, whether large or small:
 - Support for SOAP-based diagnostic process commonly used by veterinarians.
 - Improved tracking of outsourced/historical medical information vs. care provided by your shelter/rescue/veterinary clinic.
 - Exam templates, for quicker mass-data entry of common tasks.
 - Integration with the Inventory/Ordering module.
- Receipt Redesign:** receipts are being redesigned to handle quotes for services, invoices (receipts that can be paid later), and will be issuable to either Persons or Agencies.
- Person Redesign:** the various Person screens are being combined the new tabbed-style layout, to provide quicker access to all related screens for a Person:
 - Tabs for Person Profile, Memos, Ownership, Relationships, and Account (quotes, receipts, and invoices).
 - Advanced Associations, which provide start/end dates for improved tracking of associations like memberships.
- License Redesign:** the License screens are being redesigned into the new tabbed-style layout, to provide quicker access to all related screens for licensing:
 - Registration of microchip entered at the time the license is created.
 - Look up all animals linked to a person for quicker entry and renewal of licenses.
 - Batch receipt printing for mailing out license receipts.
 - Setup and validation of requirements to issue licenses per license jurisdiction.
- Inventory & Order Management - Phase II:** this update to the existing Inventory/Ordering module (which handles point-of-sale merchandise tracking) will additionally provide full tracking of items used in day-to-day animal care, such as medications, vaccines, and tests.
- Training Video Library:** recorded training videos will be available on-demand from our website later this year. These videos will help you train your staff on every module in PetPoint, all from the comfort of their desk, couch, or local Wi-Fi hotspot!

EMPOWERING ANIMAL WELFARE THROUGH DATA MANAGEMENT
