

Builders Suite

The Builders Suite is now available for purchase and includes the following functionality:

KENNEL CARD BUILDER

This module allows your organization to build and publish custom kennel cards. Equipped with a graphical interface that supports “drag-and-drop”, personnel can quickly create their dream custom cards to promote their animals.

REPORT BUILDER

Build your own set of custom reports and perform ad-hoc queries on real-time data with the Report Builder. This module provides the following:

- **Wizard:** Created to allow even the “casual user” to easily design and execute reports, the New Report Wizard walks you through all the required steps to create a new report, from designing the layout to selecting filters and sort sequencers to selecting the desired output mode (e.g., Excel, HTML, PDF, RTF).
- **Familiar Excel-Like Interface:** The Report Wizard produces fully formatted Excel workbooks (not just CSV files), allowing users to manipulate the format in an Excel-like grid and eliminating the “guess work” associated with placing data in the correct cells.
- **Charting & Graphing:** Charting and graphing features facilitate the delivery of quality visual presentations with the click of a few buttons. Multiple charts and graphs can be combined in a single report giving users a comprehensive overview of important data.
- **Automated Report Scheduler:** Designed to enhance efficiency of reporting, this module allows your organization to schedule reports to run using default configurations, at a predetermined date, without any manual intervention. It is a valuable feature for organizations running repetitive reports at set intervals using specific filters and output formats.
- **Dashboards:** Create Dashboards for executives and other areas in the organization to get real-time understanding of progress and operations.

DOCUMENT BUILDER

The Document Builder gives your organization the ability to build its own Contracts, Receipts, Waivers, Vouchers and other forms within PetPoint, with the additional benefit of saving forms in a PDF format. Merge Data with PDF Templates: The system provides the ability to populate fill-in-the-blank PDF forms with data from PetPoint. For example, a W-9 can be populated with employee information from a Person record or a Rabies Certificate can be populated with Person & Animal Record details.

For more information, pricing, or to schedule a demo please email enterprise@petpoint.com or call **1-866-630-PETS (7387)**.
