

# Constituents Services Suite

Constituents Services Suite is now available for purchase and includes the following functionality:

## ADVANCED & ONLINE LICENSING

Advanced setup functionality for PetPoint's pet licensing module provides customizable rules for license issuance and fee calculation. Functionality includes the ability to define customized rules for fees, expiration dates, issuance requirements (insurance, vaccinations, pet identification, etc.) based on issuer, animal details (type, sterilization status, etc.), and / or licensing jurisdiction. In addition, inventory tag management provides tracking of the tags associated with animal licenses issued, including separate tracking for multiple resellers.

Add the Online Licensing portal to your organization's website to allow your clients to purchase, renew, or cancel pet licenses. The portal is fully integrated into PetPoint's Licensing Module, which means reduced data entry for your staff and increased efficiencies within your licensing operations. The customizable interface allows you to apply your own styling and corporate branding, enabling seamless integration with your website. If enabled, clients may also upload required files such as a Rabies Certificate as part of the licensing transaction.

## CONTRACT MANAGEMENT

Manage service contracts with other organizations (such as municipalities without a housing facility of their own) simply and efficiently. Customize when, how, and how much your organization invoices pet owners and contracted organizations for housing, care, and medical services per service contract. Reporting provides detailed information on services rendered and disposition for each contract animal.

For more information, pricing, or to schedule a demo please email [enterprise@petpoint.com](mailto:enterprise@petpoint.com) or call **1-866-630-PETS (7387)**.
